

Máscara quadrada de arame SW

Ref: MAS004

The classic "rectangular" mesh veil with edge support. The Swienty veil is shorter at the neck and longer at the viewing area. The short neck is much more comfortable than other veils, because it is not in your way when turning your head. The veil is usually used with a helmet and our popular beaded neck rim clothing. The veil has a rubber at top and bottom to slip over the hat and the beaded neck. It is very easy to take the veil off and on due to the rubber construction. Extra veil - no helmet included!
