

rubber gloves (blue) SW

Ref: LUV005

The blue Mappa rubber gloves are lined with cotton (hypoallergenic and absorb sweat very well). They are also easy to wash and long-lasting. We strongly recommend using rubber gloves when working with acid. Tip! The size of the gloves can be determined by measuring the width of your knuckles. If the width is e.g. 10cm, we recommend a size 10. Specify the size in the "message" field of the shopping cart.
